

- ➔ Reference: Premium Classic Crew. **KS04G**
- ➔ Full custom knitted, with your design up to 6 colours.
- ➔ 120 in-stock yarn colours available. *
- ➔ Composition: 80% Organic GOTS certified combed cotton for comfort, 17% regenerated polyamide / nylon for strength, 3% elastane for stretch.
- ➔ Packaged as a pair with free recycled branded sock tag and individual compostable bag derived from potato starch.
- ➔ Minimum quantity order from 150 pairs per size and design.
- ➔ Available sizes: one size fits all for men, one size fits all for women. A one size fits most is also available. Other sizes available upon request.
- ➔ High quality organic cotton results in a snug soft fit that absorbs sweat, enhances durability and offers superior comfort.

- ➔ Reinforcement in heel and toe provide durability to dramatically improve product life.
- ➔ All materials used in the production of socks are Oeko Tex certified. Cotton is certified GOTS organic.
- ➔ Manufactured in Europe according to ISO 9001 quality management system, 14001 and ISO 45001.

- ➔ Care instructions: Machine wash cold on gentle cycle, do not bleach or tumble dry. Do not dry clean or iron.

Production lead times: From 2 to 6 weeks depending on the quantity and our production schedule.

Transport: via TNT ground service within 1 week throughout the EU. Alternative air freight in 48 hours within the EU, UK and USA.

OPTIONAL

- ➔ Terry cushioning on the sole can be added to provide great comfort and to prevent blisters and chaffing from occurring. This will reduce sock and foot pain during sports or daily workout activity.
- ➔ Ribbing can be added to prevent feet from slipping inside of the sock.
- ➔ The height of the cuff can be adjusted.
- ➔ Upcycled cotton available.

OBSERVATIONS

- ➔ All socks are custom knitted allowing us to change the technical characteristics of the socks
- ➔ *120 in-stock colours are available and are used to best match Pantone colours. On occasion, specific colours may be out of stock so we will substitute the second-best matching colour for the out-of-stock colour.
- ➔ Organic GOTS Pantone dyed yarns can be made but will require an additional 4 weeks to produce. Conditions apply.

ECOLOGICAL FOOTPRINT

Cotton covers 2.5% of the world's cultivated land but uses 10-16% of the world's pesticides (including herbicides, insecticides, and defoliants), more than any other single major crop. Environmental consequences of the elevated use of chemicals in the non-organic cotton growing methods include the following:

- ➔ chemicals used in the processing of cotton pollute the air and surface waters.
- ➔ decreased biodiversity and shifting equilibrium of ecosystems due to the use of pesticides.

PESTICIDES

Organic cotton is grown without the use of synthetic pesticides and contains no synthetic pesticides. Pesticides used in the production of conventional cotton include orthophosphates such as phorate and methamidophos, endosulfan (highly toxic to farmers) and aldicarb. Other pesticides persisting in cotton fields include Trifluralin, Toxaphene and DDT.
